For Immediate Release

May 2010

Hafmynd ehf, the developer and manufacturer of the Gavia AUV, recently got nominated for the prestigious Icelandic Growth-Sprout Awards, awarded annually to the sprout-company showing the most growth in annual turnover.

The purpose of these awards is to bring attention to the outstanding efforts of these companies and to create further interest and understanding of the environment that sprout-companies grow from. The Growth-Sprout Awards are awarded by the SI, the Federation of Icelandic Industries, RANNIS, the Icelandic Center for Research, and by the University of Reykjavik.

This year, Hafmynd was one of four nominees for the period of 2008-2009, and although not the winner, Hafmynd finds the nomination to be recognition for its successful management in the last years, and a positive encouragement for the future.

For further information on the Gavia AUV please contact info@gavia.is or visit www.gavia.is
